-

Future Planning

- Short-Term Goals:
 1. Master full-stack development and build real-world web applications.
 2. Contribute to open-source projects to gain collaborative experience.
 3. Complete internships to gain industry exposure.
- Long-Term Goals:
 4. Secure a position as a Software Developer in a reputed tech company.
 5. Pursue higher education (e.g., M.Tech/MS or certifications in Cloud Computing/AI)
 6. Launch my own tech startup focusing on innovative digital solutions.

SWOT Analysis:

Strength:

- Quick learner and problem solver.
- Self-motivated.
- Good project experience.

Weakness:

- Limited real world work-experience.
- Need to develop more communication skills.
- Need more practice in team-based development.

Opportunities:

- Plenty of free and paid online learning resources.
- Can expand to IoT and automation.
- Growing demand for programmers.

Threats:

- Competitive job market in tech.
- AI tools reducing low-level programming job roles.
- Rapid tech evolution require constant upskilling.
